

Developing best practices and ethical guidelines for assessing reuse of digital content

Caroline Muglia (she/hers), University of Southern California
Joyce Chapman (she/hers), Duke University

Library Assessment Conference
March 17, 2021

AGENDA

- I. Overview of grant, project team, and deliverables
- II. Ethical guidelines
- III. Best practices
- IV. Next steps
- V. Questions!

- Digital Content Reuse Assessment Framework Toolkit (D-CRAFT)
- Developed by the DLF AIG Content Reuse Working Group (starting in 2015)
- IMLS National Leadership Grants for Libraries - **LG-36-19-0036-19**
- July 1, 2019 - December 31, 2021
- Ethical guidelines, recommended practices, and assessment training for GLAMRD* institutions

*Galleries, Libraries, Archives, Museums, Repositories, and Data

PROJECT TEAM

- **Elizabeth Joan Kelly**, Loyola University, New Orleans
- **Ayla Stein Kenfield**, University of Illinois at Urbana-Champaign
- **Kinza Masood**, Mountain West Digital Library
- **Caroline Muglia**, University of Southern California
- **Ali Shiri**, University of Alberta
- **Santi Thompson** (PI), University of Houston
- **Liz Woolcott**, Utah State University
- **Joyce Chapman**, Assessment Consultant, Duke University
- **Derrick Jefferson**, Diversity Consultant, American University
- **Myrna E. Morales**, Consultant, Massachusetts Coalition of Domestic Workers; PhD LIS candidate, University of Illinois iSchool
- *Accessibility Consultant, Future Hire*
- *Instructional Design Consultant, Future Hire*

- **Paige Dansinger**, Better World Museum
- **LaToya Devezin**, Jimmy Carter Presidential Library and Museum
- **Genya O' Gara**, Virtual Library of Virginia (VIVA)
- **Anna Naruta-Moya**, Indigenous Digital Archive
- **Kelly Riddle**, LA County Library
- **Betty Rozum**, Utah State University
- **Kayla Siddell**, Xavier University of Louisiana
- **Holly Smith**, Spelman College

1

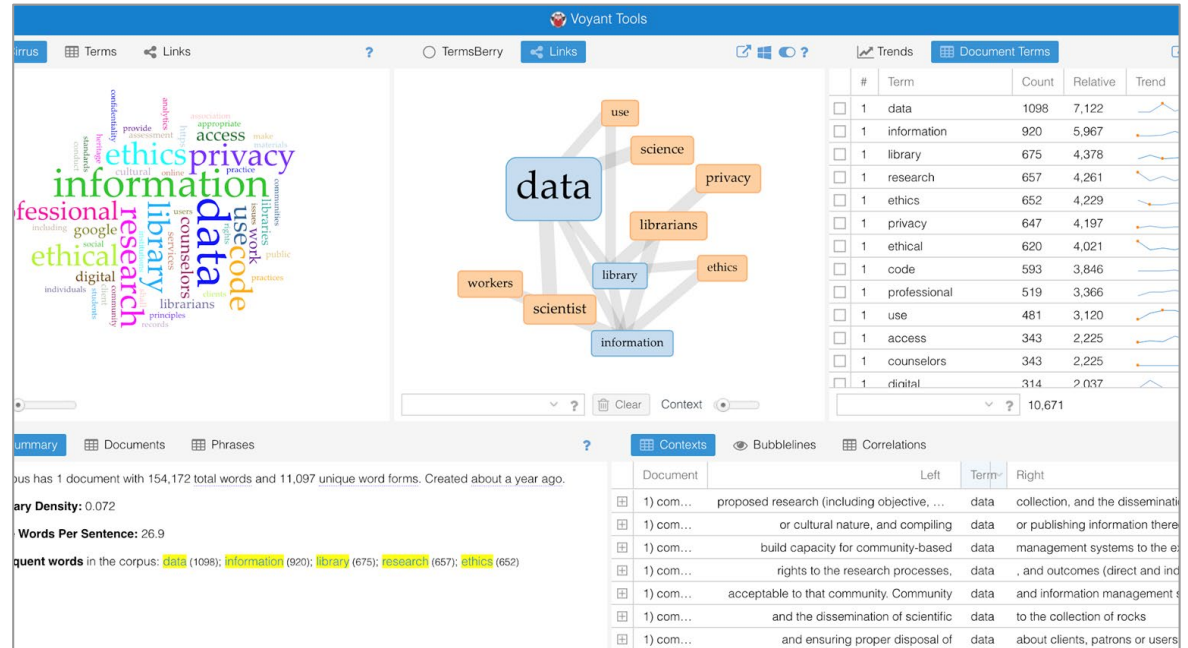

ETHICAL GUIDELINES
FOR ASSESSING REUSE OF DIGITAL CONTENT

What are the Guidelines and why are they important?

- Set of **principles to guide an ethical assessment of reuse**
- **Use case developed from 2017-2019** grant (Measuring Reuse)
- **Reviewed professional GLAMRD** codes, policies, guidelines
- **Consulted privacy and ethics working groups** focused on GLAMRD institutions, leveraged Privacy and DEIA consultants
- Goal: **Utility!** High level goal, scope, terminology **and** core values with descriptions, examples, practical applications

ASSESSMENT

- Developed a gauge
- Collected codes via Zotero
- 2 groups to read collected documents against the gauge. Every document had multiple readers.
- Voyant to conduct word/phrase frequency analysis

ASSESSMENT

- 44 codes reviewed
- 4,283 terms reviewed for frequency
- 30 phrases reviewed for frequency
- Using this information, we began to develop Ethical Guidelines

1	Term	RawFrequency
2	ethic/ethics/ethical/ethically	1314
3	data('s)	1101
4	library/libraries	974
5	information	920
6	research	657
7	privacy	647
8	code	593
9	professional	519
10	use	481
11	practice(s)	424
12	community(ies)	393
13	access	343
14	counselors	343

6 CORE VALUES

- Inclusion, Diversity, Equity, Accessibility and Social Justice (IDEAS)
- Privacy
- Impartiality
- Professional Development/ Training
- Transparency
- Traditional Knowledge, Cultural Heritage, and Intellectual Property

the assessment of use and reuse of digital content

Drafted by the Digital Content Reuse Assessment Framework Toolkit (D-CRAFT) [Project Team](#) and [Consultants](#)

Finalized on November 30, 2020

[Here is a refresher](#) on the Commenting feature on the Google Document platform.
[Here is a short Qualtrics survey](#) for those who prefer to comment on this platform.

Introduction

The work of Galleries, Libraries, Archives, Museums, Repositories, and Data (GLAMR) institutions in 2020, perhaps more than ever before, must be informed by a critical awareness of identity, socio-economic and racial privilege, access, and privacy, among other important criteria. Ethical considerations should govern exchanges between practitioners, users, and communities that may create or donate digital content. These considerations can signal an investment in meaningful collaborations that empower all stakeholders.

The Digital Content Reuse Assessment Framework Toolkit (D-CRAFT) Project Team ("Project Team") developed the Ethical Considerations and Guidelines for the Assessment of Use Reuse of Digital Content ("Guidelines"). D-CRAFT is a 2.5-year Institute of Museum and Library Sciences (IMLS) federal grant with goals of developing resources, recommended practices, and use cases for sustainably measuring and evaluating the reuse of digital assets held by cultural heritage knowledge organizations.¹ D-CRAFT is informed by the Project Team's initial 2017-2018 IMLS grant, "Developing a Framework for Measuring Reuse of Digital Objects," which succeeded in creating a toolkit with resources, best practices, and use cases for studying the reuse of digital assets held by libraries.²

collections.

- **Responsibility of the Practitioner:** Pragmatic approaches for practitioners to realize the guidelines when planning and engaging in use and reuse assessment, including analysis and distribution of results.
- **Transparency:** An ongoing, iterative method to maintain responsible, inclusive, and accessible forms of communication to community stakeholders including creators, individuals and communities who may be depicted in collection materials, patrons, and curators.

Core Values

The Core Values suggested and presented in this document are informed by the professional codes of ethics put forward by the discrete yet complementary communities of practice that form the GLAMR-sphere: library,⁶ archival,⁷ and museum⁸ workers, information and data curators/maintainers.⁹

The Core Values govern the ways in which practitioners collect, use, and reuse data, and the privacy and confidentiality of collection users when assessing use and reuse of digital objects.

⁶ See the ALA Code of Ethics <http://www.ala.org/tools/ethics> and the IFLA Code of Ethics for Librarians and other Information Workers <https://www.ifla.org/faife/professional-codes-of-ethics-for-librarians>.

⁷ See the SAA Core Values Statement and Code of Ethics <https://www.ifla.org/faife/professional-codes-of-ethics-for-librarians> and the ICA Code of Ethics <https://www.ica.org/en/ica-code-ethics>

⁸ See the AAM Code of Ethics <https://www.aam-us.org/programs/ethics-standards-and-professional-practices/code-of-ethics-for-museum/> and ICOM Code of Ethics: <https://icom.museum/en/resources/standards-standards-guidelines/code-of-ethics/>

OPEN COMMENTING

- ❑ Advisory Board Members reviewed in 2020; Team implemented comments
- ❑ Open commenting period: January 4 - February 12, 2021
- ❑ Sent to 20 lists/ email of groups or organizations led by or including underrepresented groups
- ❑ Sent to 35 lists/ email of groups or organizations focused on GLAMR
- ❑ Google comments: 37 individual commenters
- ❑ Qualtrics: 8 responses

SELECT COMMENTS

- “There is a massive gap... about GLAMR's responsibility to use/ reuse digital content that meet the needs of **people with functional impairments or disabilities.**”
- “The privacy section is focused on individual privacy which makes sense if the scope of this is web analytics. If the scope is also assessment for the ethics of sharing content online, then this **section should include cultural and community privacy.**”
- “This is the biggest weak spot of this document: **there are many words and phrases in this document that are relatively new in academic writing, which are poorly defined here.** I had several moments of frustration as I read, wondering what certain words and phrases mean to the authors, while knowing these words and phrases may mean something different (often something fraught) to the communities with which I work.”

WHAT'S NEXT

- Asked for and received **thoughtful, insightful, meaningful engagement** with community practitioners. Now we have to do something with it!
- **Developed a Summary Document** to capture the initial feedback.
- **Identifying experts in areas** of Privacy, Traditional Knowledge, Accessibility, and others for a more substantive contribution to the Guidelines.

INFO ON EACH METHOD

DEFINITION

1-2 sentences explaining what this method is used for and how it applies to use/reuse assessment.

USES

Several paragraphs explaining the insights this method can provide for assessing digital object use or reuse in particular.

TOOLS

Up to five common tools that can be used to collect data or perform this assessment method (linked to Tool pages).

RESPONSIBLE PRACTICE

Explain how the Ethical Guidelines applies to this method and whether there are any special concerns.

STRENGTHS & WEAKNESSES

What is this method particularly good at / bad at telling practitioners about the use/reuse of digital content?

HIGHLIGHTED EXAMPLES

Annotated links to relevant articles, case studies, blog posts, etc., that demonstrate use of this method.

TOOLS FOR EACH METHOD

TOOLS

Bing Image Match

Google Image Search

TinEye MatchEngine

Yandex

EXAMPLES OF TOOLS

TinEye MatchEngine

Data Collection Tool

Basic information

- URL: <https://services.tineye.com/MatchEngine>
- Cost: Fee/Subscription
- Open Source: No

Used for the following methods

- [Reverse Image Lookup](#)

How to use this tool for use/reuse assessment

TinEye is an image search and recognition company. Its MatchEngine is used for its Reverse Image Search by allowing practitioners to conduct image searches on other websites. MatchEngine goes beyond Reverse Image Search by allowing practitioners the ability to do multiple or batch queries at one time, and to search for specific keywords. As a fee-based service, MatchEngine will generate an index of the results. Practitioner wishes to search, stores this index on its servers, and queries the index depending on the service package purchased by the practitioner.

- FAQ: <https://services.tineye.com/developers/matchengine/faq/>

Ethical guidelines

Practitioners should follow the practices laid out in the "[Ethical considerations and guidelines for the assessment of use and reuse of digital content](#)." The Guidelines are meant both to inform practitioners in their decision-making, and to model for users what they can expect from those who steward digital collections.

Strengths

Alert Services

- Unlike some other alert services, like Google Alerts and Google Scholar, Mention includes social media, forums, and reviews.
- Unlike Google Alerts or Google Scholar, Mention includes a wide range of reach, influencers, sentiment, and more, whereas other alert services are limited individually and the practitioner must perform their own aggregation.
- Very customizable and has dedicated tech support.

Altmetrics

- Unlike PlumX or Altmetric, does not require the use of persistent identifiers.

Weaknesses

Alert Services

- Functionality varies depending on which plan the institution pays for; export is only available starting at the Company plan.
- The number of alerts that can be setup is very small compared to other services.
- Mention is targeted at brands and agencies, so the interface is not as user-friendly as other services.
- Some users reported that not as many sources were searched as other services.

Altmetrics

- Functionality varies depending on which plan the institution pays for; for example, data export is only available starting at the Company plan.

SocSciBot

Data Collection Tool

Basic information

- URL: <http://socscibot.wlv.ac.uk/index.html>
- Cost: Free
- Open source: No

Used for the following methods

- [Link Analysis](#)

How to use this tool for use/reuse assessment

SocSciBot is a free Windows application that crawls a website specified by a practitioner and extracts hyperlinks from it. The program outputs the results in a variety of ways, such as a list of page and link counts, a list of all external links, and a list of directory, domain, and file interlinking. The program allows a practitioner to review output data in a text file, in an Excel spreadsheet, or in a network visualization. This tool can help practitioners identify and quantify the variety of hyperlinks contained on websites, including links to digital objects.

- SocSciBot 4's Tutorial: <http://socscibot.wlv.ac.uk/socscibot4help/tutorial1.htm>

Ethical guidelines

Practitioners should follow the practices laid out in the "[Ethical considerations and guidelines for the assessment of use and reuse of digital content](#)." The Guidelines are meant both to inform practitioners in their decision-making, and to model for users what they can expect from those who steward digital collections.

Additional guidelines for responsible practice

It is the responsibility of the practitioner not to overload the target web servers by crawling them too frequently. SocSciBot asks practitioners not to crawl web sites of organizations that may not be able to afford the additional bandwidth, taking into particular account the

OPEN COMMENTING

We need the suggestions and opinions of experts like you! Please take time to respond to the call for feedback that will be coming later this spring.
