The Importance of Library Assessment in HR
A Case Study of Transitioning to a Hybrid Work Environment after the COVID-19 Pandemic

Sally Bowler-Hill, Health Sciences Library & Informatics Center

PURPOSE
The purpose of this study was to explore and document employee perceptions of remote work as a potential option for normal operations, based on experiences from the COVID-19 pandemic. The goals were to obtain feedback about remote work / telecommuting to develop a guideline, and measure satisfaction with the hybrid work environment several months after it was implemented.

METHODS
Two web-based surveys were sent to all library faculty and staff (n = 20 & 22), one in April 2021 and the other in March 2022. Both surveys included multiple-choice and free-text questions designed in SpringShare LibWizard. Both were declared minimal risk by our institutional IRB.

The first survey included questions about how often employees wanted to work remotely; what tasks they believed could be done productively from home; what equipment they needed at home; and what challenges they believed the library faced with employees working remotely. This feedback was used to develop a remote and telecommuting guideline that was implemented in July 2021.

The second survey assessed employees' experience telecommuting or working remotely since the guideline was implemented, including questions about schedules, satisfaction, equity, what worked better than expected, and continuing challenges.

RESULTS
Satisfaction with Schedules (Survey 2)

Survey # | 1 | 2
--- | --- | ---
Response Rate | 85% | 86%
Responses | 17 | 19

Working from Home Comparison Desired to Actual

Survey 1 | Survey 2
--- | ---
1 day per week | 2 | 1
2-3 days per week | 4 | 2
>3 days per week | 1 | 1

Challenges with Hybrid Work Environment Comparison

Survey 1 | Survey 2
--- | ---
Staffing the building & schedules | 12 | Having right tools where working
Demand for in-person services | 8 | Communication / finding people
Difficulties hosting hybrid meetings | 5 | IT issues
IT issues | 5 | Sense of connection
Equity/fairness on campus vs. remote | 5 | Hybrid meetings/ teaching
Difficulties working with hybrid teams | 2 | Schedule variability

CONCLUSIONS
Assessment programs can have a powerful impact on a library's administrative operations, especially when implemented at the beginning of a new initiative. Data gathered when the UNM Health Sciences Library and Informatics Center (HSLIC) began offering remote and telecommuting work options provided a valuable baseline used to develop a guideline, which can be built upon in the future, as this initiative matures. The strengths and challenges of a hybrid work environment can also be assessed longitudinally and adjustments made.

More assessment projects related to administrative operations should be looked to as possible research opportunities. They offer generalizable, and often overlooked, case studies that provide valuable information for the library community.

Acknowledgements:
Many thanks to the faculty and staff of UNM HSLIC for participating in this research project, and to Melissa Rethlefsen, Executive Director, for supporting it.
