

# Networking in North Texas: Connected by Assessment

## PURPOSE:

Assessment is increasingly important in academic libraries, and assessments require greater focus on the results of library activities as opposed to traditionally collected inputs and outputs. Libraries need effective ways to share information about successful techniques, internally developed tools, vendor experiences, etc. – especially when budget limitations may reduce the ability of some to attend conferences. Librarians in North Texas are working to create a regional “culture of assessment” via a network of assessment librarians.

## DESIGN/METHODOLOGY/APPROACH:

In the fall of 2008, academic librarians in North Texas began meeting annually to share information about library assessment activities at their institutions. The meeting location and planning rotates among the participating libraries.

The first meeting focused on overviews of assessment activities at each institution. At the second meeting librarians representing different institutions presented detailed information about specific assessment initiatives of wide interest. This meeting also included an evaluation of each library’s interests and strengths to identify possible collaborators/consultants among participants.

To provide a venue for communication outside of the meetings, a social network on Ning was created: North Texas Library Assessment (NTLA) at <http://ntlibassess.ning.com>. When Ning became a fee-based site in 2010, the network moved to Google Groups (<http://groups.google.com/group/ntlibassess>).

## FINDINGS:

- Academic librarians are willing to take time out of their schedules to meet and discuss assessment. Twenty-two librarians from 11 academic institutions attended the first meeting, and 15 librarians from nine institutions attended the second. The third meeting is scheduled later in 2010.
- Social networking tools permit ongoing sharing and communication. Information and questions about conferences, assessment tools, and related topics are being posted on the NTLA site.

## PRACTICAL IMPLICATIONS/VALUE:

Bringing together librarians in the area who are involved in assessment has established a network of contacts for participants. They know what types of assessment activities are going on at area libraries and who to contact if they are planning similar activities or facing similar issues.

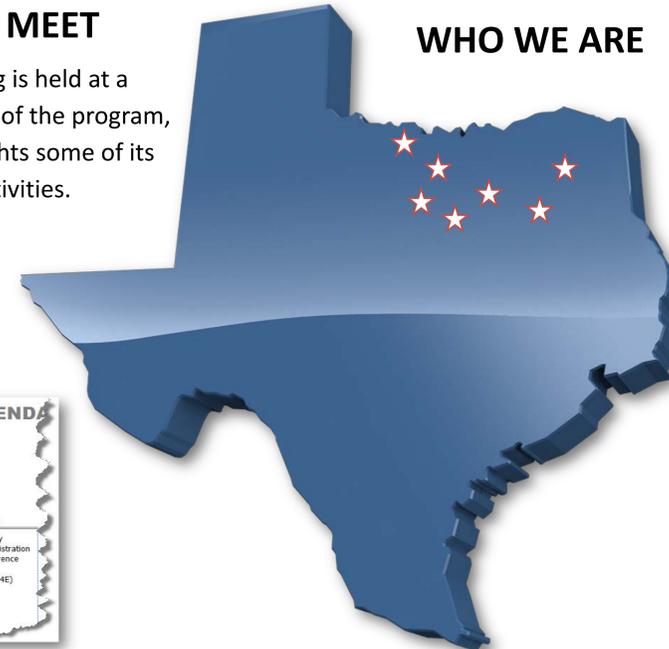

## WHAT WE DO

## WHERE WE MEET

Each annual meeting is held at a different library. As part of the program, the host library highlights some of its assessment activities.

## WHO BENEFITS

*“Lewis Library is very excited to be a member of the North Texas Library Assessment Group and happy to be able to draw upon the knowledge and experience of library assessment experts in the group. We made immediate improvements in our assessment and evaluation plans based on exposure to the best practices of group members.”*
