Notes about Surveys:

1. For post-instruction end-of-semester surveys, print format has a higher return rate than electronic format.

2. Sample subjective question:
   How useful were the in-class searching exercises in terms of familiarizing you with the use of Chemistry library resources? (Choose one)
   ___ very useful
   ___ useful
   ___ not very useful
   ___ not useful at all

3. Sample objective question:
   Why is it useful to read the abstract of an article before getting a copy of the full-text? (Choose one)
   ___ It gives you all the citation information needed to obtain the full text.
   ___ It gives you an idea of what the article is about.
   ___ It provides access to the references used by the author.
   ___ It indicates that the article could be found electronically.

Notes about Exercises:

1. Plan enough time, especially if students are required to leave the classroom.

2. Sample exercise question:
   Using the techniques just demonstrated:
   o Draw the structure shown below.
     ![Structure](image)
   o What is a name for this compound?
   o Obtain its IR spectra.
   o Can you find a 1949 article which reports the production of this compound?
   o What yield is reported?
